1933 7590 09/21/2007 FRISHAUF, HOLTZ, GOODMAN & CHICK, PC 220 Fifth Avenue 16TH Floor NEW YORK, NY 10001-7708			EXAMINER VO, TUNG T	
			ART UNIT 2621	PAPER NUMBER
			MAIL DATE 09/21/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/910,738	Applicant(s) UCHIDA ET AL.	
	Examiner Tung Vo	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 47 and 48 is/are pending in the application.
 4a) Of the above claim(s) 1-46 is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 47 and 48 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 December 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 47 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iki (US 2001/0030654).

Re claims 47 and 48, Iki discloses an imaging apparatus for a microscope (fig. 1), comprising: an imaging element (12 of fig. 1) which picks up an image observed through the microscope (11 of fig. 1); and an operation display section (14 of fig. 1); wherein the operation display section comprises: an operation section (14 and 15 of fig. 1, see also fig. 2) comprising an imaging start instructing member ([0150]), a recording range enlargement instructing member and a recording range reduction instructing member (1361 and 1361 of fig. 2)), a display enlargement instructing member, and a display reduction instructing member ([0157]-(0158)); a recording section (137 of fig 1) which includes a removable recording medium (137a of fig. 1), and which is configured to temporarily records the image picked up by the imaging element; a display section (14 of fig. 1) configured to display the image temporarily recorded by the recording section at a display magnification, which is variable; and a control section (138 of fig. 2) which controls recording and reproducing operations of the recording section and the display magnification of the display section, and which selectively controls a recording range of the

Art Unit: 2621

image instructed by the recording range enlargement instructing member and the recording range reduction instructing member (the operator would obviously instruct the controller (138 of fig. 2) to record or store the enlargement and reduction range (fig. 7)), and the display magnification of the image instructed by the display enlargement instructing member and the display reduction instructing member (Windows (141a and 141b of fig. 5) would obviously display the enlargement and reduction of image instructed by the operator), wherein the control section has a moving image imaging mode (Note a live picture storage region (1361 of fig. 2) for temporarily storing the live image data received from the electronic camera (12 of fig. 1) are assigned to the memory (1361 of fig. 2) inside the computer 13 (see FIG. 2)) which continuously repeats temporary recording by the recording section and display by the display section, and a still image imaging mode (1362 of fig. 2) which records an image within the recording range among images temporarily recorded by the recording section, and wherein the control section controls the recording and reproducing operations (See figs. 5-7; Note the operator would obviously control the operations of entire apparatus) in an operation mode selected from:

a first operation mode in which the recording range (fig. 7, Note the setting would obviously set the recording range of the still image (fig. 7)) of the image in the still image imaging mode is fixed (Note the storage (1362 of fig. 2) is recording the still image), and a display range and the display magnification of the image in the moving image mode are variable as an angle of view of the image displayed on the displayed section is changed ([0100], [0101], [0108]; 141a of fig. 4, an enlargement or reduction processing is executed for the live image data in match with the display size of the right window, still image is displayed in window 141b of

live image, this would suggest the enlargement of image is variable to be displayed (141b of fig. 2) by on the settings (141c of fig. 2));

a second operation mode in which the recording range of the image in the still image imaging mode is variable (141i of fig. 5), and the display range and the display magnification of the image in the moving image mode are fixed (141b of fig. 5, Note the enlarged or reduced live image would obviously be displayed on the window 141b of fig. 5 in a fixed size); and a third operation mode in which the recording range of the image in the still image imaging mode is variable and the display range and the display magnification of the image in the moving image mode are variable as an angle of view of the image displayed on the display section is changed based on the recording range of the image in the still image imaging mode ([0109], [0128], [0187], figs. 9 and 10, [0122]-[0148]); wherein the operation section further comprises: a recording range display instructing member which causes the display section to display the recording range of the image; a recording range instructing member which varies the recording range of the image; and an image list display instructing member which causes the display section to display a list of images of predetermined areas of the image recorded in the record section (figs. 5-6; Note still images (141i), still image display (141b), and live zoom or enlargement or reduction image display (141a)).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2621

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

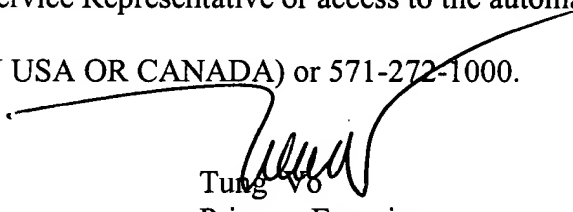

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung Vo whose telephone number is 571-272-7340. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2621

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
